

# **Building Excellence. Empowering Workforces.**

Contracting & Technical Resource Solutions  
for the Construction Industry

# A Partner Built on Precision, Safety & Scale

Langford is a multi-disciplinary construction and technical services organisation delivering high-quality contracting solutions supported by a robust technical resource pool. With access to 1,300+ trained and certified technical resources, we enable seamless project execution by aligning skilled human capital with complex industry requirements.

Our integrated model combines engineering expertise, safety-led operations and a scalable workforce ecosystem designed for reliability and performance.

# Contracting

High-quality civil, MEP and turnkey contracting driven by in-house engineering, disciplined execution and safety-led project delivery.

# Technical Resource Pool

A structured technical resource ecosystem comprising 1,300+ skilled, semi-skilled and certified professionals, deployed across construction, infrastructure and industrial environments to meet diverse project requirements.

**200 +**

Compliant Operations

# Our Story

Founded with a commitment to quality, safety and execution excellence, Langford has evolved into a trusted partner for developers, consultants and industrial clients. Our core strength lies in integrating contracting capabilities with a large-scale, technically skilled resource pool, enabling flexibility, speed and consistency across project lifecycles.

# Vision

To be a regional leader in delivering quality engineering services with integrity and innovation.

# Mission

To deliver premium engineering solutions supported by modern techniques, skilled resources and disciplined execution.

# Integrated Contracting Capabilities

Service Bands:

Civil & Structural Works

MEP Services

Joinery & Aluminium Works

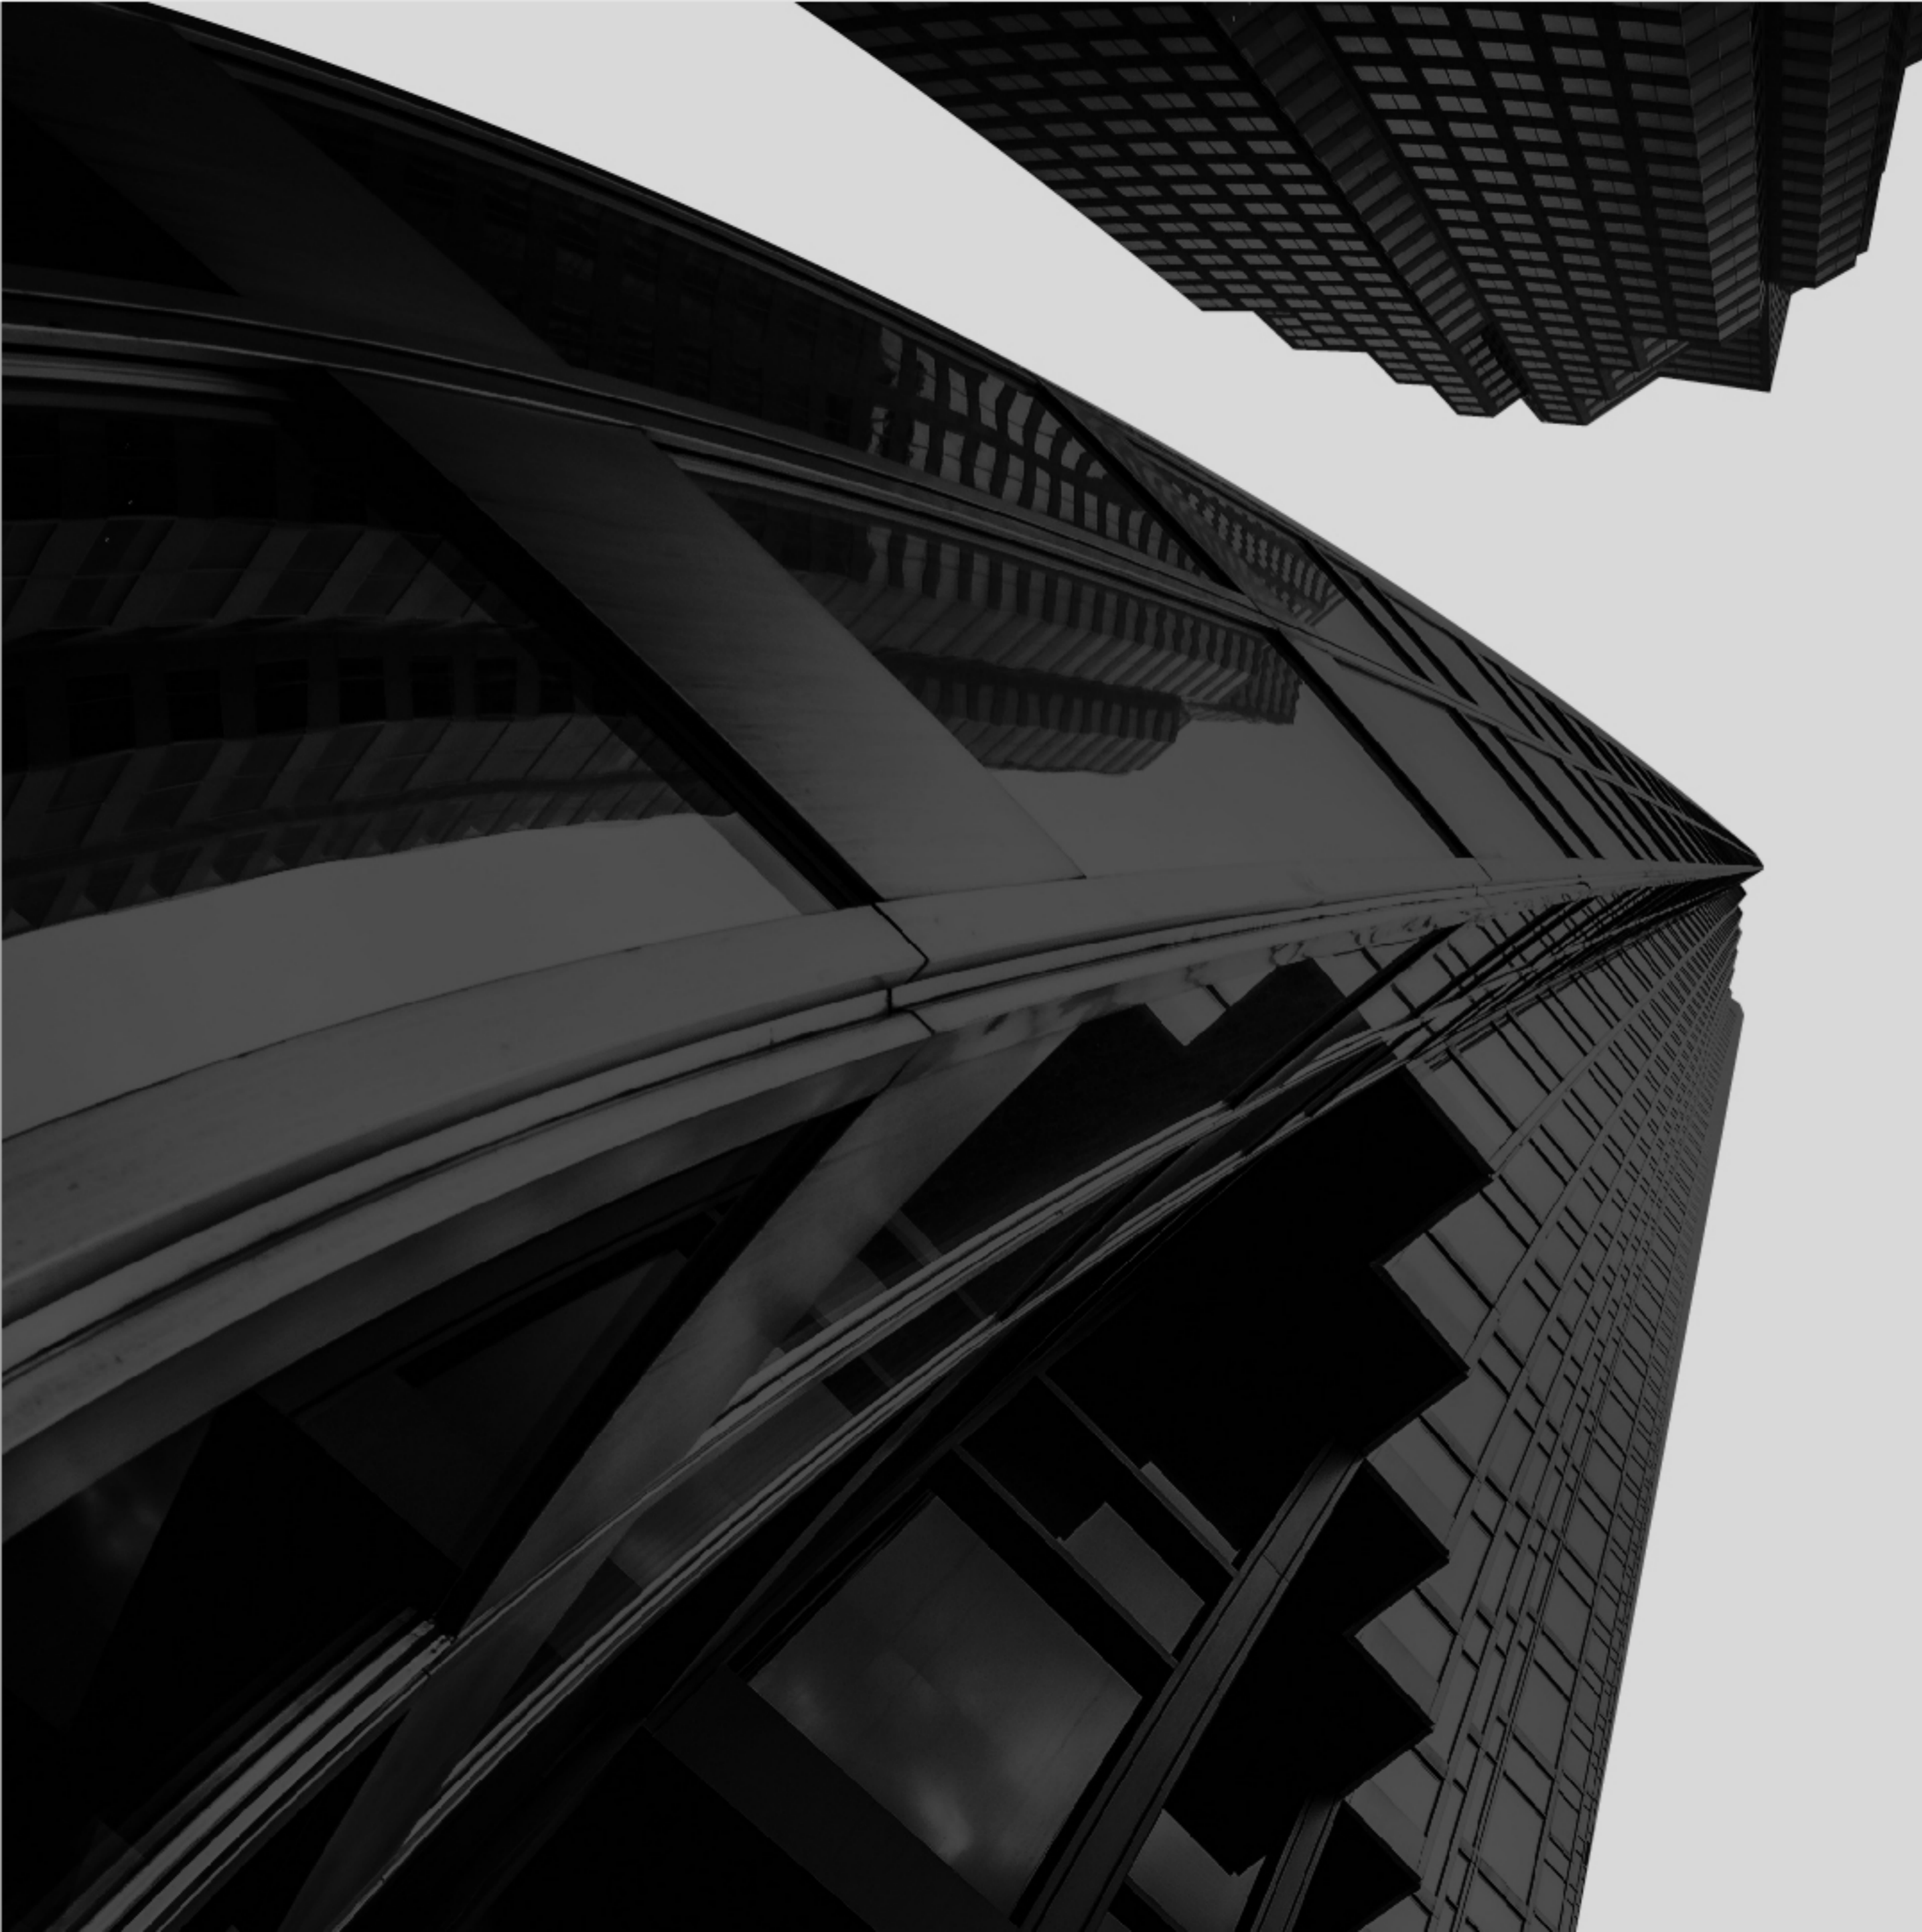

# Engineering Excellence

Langford adopts modern engineering practices, digital planning tools and strict QA/QC protocols to ensure predictable outcomes across time, cost and quality.

## Highlights:

- Advanced planning systems
- Robust supervision
- Transparent reporting

# Safety Is a Culture

We follow global HSE standards and embed safety at every stage of execution while adopting responsible and sustainable engineering practices.

# A Scalable Technical Resource Ecosystem

Langford operates as a technical resource partner, offering skill-mapped, safety-trained and performance-monitored resources aligned to specific project demands.

# Skilled & Semi-Skilled Workforce

## Oil & Gas / Industrial Construction

- Structural Erectors
- Structural Fabricators
- Structural Fitters
- Pipe Fitters (CS / SS / Alloy)
- Industrial Pipe Fitters
- Pipe Fabricators
- Piping Foremen
- Piping Supervisors
- Scaffolders
- Riggers (Level I, II & III)
- Painters (Industrial & Building)

## Welding Professionals

- ARC Welders (3G / 4G / 6G)
- MIG Welders
- TIG Welders
- Multi-Process Welders
- Pipe Welders (Carbon Steel / Stainless Steel / Alloy)
- Structural Welders
- FCAW / SAW Welders

## Electrical - Industrial & Building

- Industrial Electricians
- Oil & Gas Electricians
- Building Electricians
- Cable Jointers
- Panel Board Technicians
- Instrument Electricians
- Electrical Helpers

## Mechanical & MEP Trades Ductmen

- HVAC Technicians
- HVAC Duct Fabricators
- HVAC Duct Installers
- Plumbers (MEP / Industrial)
- Pipe Insulators
- Mechanical Helpers
- MEP Technicians
- MEP Helpers

## Civil & Construction Support

- Grinders
- Riggers (Level I, II & III)
- Scaffolders
- Helpers (Civil / Mechanical / Electrical)
- Material Handlers
- Fire Watchers

## Construction Industry

- Masons & Shuttering Carpenters
- Steel Fixers
- Painters & Tile Fixers
- Gypsum & Drywall Installers
- Waterproofing Technicians
- Formwork Carpenters

# Deployment Process

01.

## Requirement Study

Detailed understanding of project scope, technical needs, timelines and compliance requirements to define precise resource specifications.

02.

## Screening & Skill Verification

Candidate profiling, trade testing, certification validation and safety screening to ensure competency and role alignment.

03.

## Mobilisation

Structured onboarding documentation, safety induction and timely deployment as per project schedules.

04.

## On-site Monitoring & Replacement Assurance

Continuous performance monitoring, supervision support and immediate replacement assurance to maintain productivity and safety standards.

# The Langford Advantage

- Integrated contracting + model
- Quick mobilisation & execution readiness
- Strong safety orientation
- Professional management systems
- Transparent coordination

Selected residential

Commercial

Industrial

Institutional

Detailed case studies available upon request

## CSR:

Community development, Workforce welfare,  
Training initiatives

## Compliance:

Licences, Registrations, Certifications
